

Call for Papers

Two Day Virtual International Conference on

**Achieving Sustainable Development Goals in Post-COVID-19 World:
Regional Challenges, Opportunities and Policy Options
(24-25 November 2022)**

**SELECTED PAPERS WILL BE PUBLISHED IN PEER REVIEWED JOURNAL
"Regional Economic Development and Research"**

Sustainable Development Goals (SDGs) include 17 goals and 169 targets for development of society, economy, and environment. SDGs envisage achieving human prosperity through reducing poverty, ensuring equality, eliminating hunger, mitigating climate change, managing resources, and protecting environment. SDGs call for effective implementation of policies for achieving the targeted goals. COVID-19 pandemic affected both the developed and developing countries due to unprecedented multidimensional crisis leading to global recession. COVID-10 crisis has exposed multi-faced vulnerability in terms of healthcare, education, social protection, regional and global value chains, international production networks, tourism, financial markets, energy resources, and environmental protection. The COVID-19 pandemic has impacted worldwide and challenged the life style drastically, which posed the questions to rethink a more sustainable living specifically the world we want to live in, rebuilding in a more sustainable and equitable way of life, and the role of multiple policies for this transformation and achieving SDGs in the new post-COVID 19 world. All this pose diverse regional challenges and opportunities to policy makers to achieve SDGs. Achieving the SDGs emphasize the role of individuals and societal transformation for sustainability and the contribution to the survival and prosperity of humanity, including critical thinking skills, and rebuilding more resilient systems. COVID-10 pandemic makes the SDGs highly relevant to address the social and economic vulnerabilities and to achieve sustainable recovery using both short and long-term integrated policies and charting a robust roadmap.

A handwritten signature in blue ink, appearing to be "Ankur".

Against the above backdrop, the Two Days Virtual International Conference on Sustainable Development in Post-COVID-19 World: Regional Challenges, Opportunities and Policy Options aims at strengthening and scaling up the SDGs to enable present generations to meet their needs while allowing future generations to meet their own, using a balanced and integrated approach focusing on the economic, social and environmental dimensions of sustainable development. The conference targets at understanding SDGs, generating evidence based on research and substantive good practices for advancing policies by involving multi-stakeholders including professionals and practitioners from the governments and non-governmental organizations, educational and research institutions, communities and youth, academia and other stakeholders.

The conference intends to deliberate on the following sub-themes:

1. COVID-19, economic recession and SDGs
