#### 3. PASSAGE:

The New Year is a time for resolutions. Mentally at least, most of us could compile formidable lists of do's and don'ts. The same old favourites recur year in and year out with monotonous regularity. Past experience has taught us that certain accomplishments are beyond attainment. If we remain inveterate smokers, it is only because we have so often experienced the frustration that results from failure. Most of us fail in our efforts at self improvement because our schemes are too ambitious and we never have time to carry them out. We also make the fundamental error of announcing our resolutions to everybody so that we look even more foolish when we slip back into our old bad ways.

#### Directions: Questions 7 and 8.

Read the passage and select the most suitable answer to questions from the given choices.

Observe the dilemma of the fungus: It is a plant, but it possesses no chlorophyll. While all other plants put the sun's energy to work for them combining the nutrients of ground and air into the body structure, the chlorophylls must look elsewhere for energy supply. It finds it in those other plants which, having received their energy free from the sun, relinquish it at some point in their cycle either to animals (like us humans) or to the fungi.

In this search for energy the fungus has become the earth's major source of rot and decay. Wherever you see mould forming on a piece of bread, or a pile of leaves turning to compost, or a blown-down tree becoming pulp on the ground, you are watching a fungus eating. Without fungus action the earth would be piled high with the dead plant life of past centuries. In fact, certain plants which contain resins that are toxic to fungi will last indefinitely; specimens of the redwood, for instance, can still be found resting on the forest floor centuries after having been blown down.

- 7. The passage states all the following about fungi EXCEPT :
  - (A) They are responsible for the decomposition of much plant life
  - (B) They cannot live completely apart from other plants
  - (C) They are vastly different from other plants

Read the Passage below and solve Questions from 6 to 9 :

The enjoyment of physical possession of things would seem to be one of the prerogatives of wealth which has been little impaired. Presumably nothing has happened to keep the man who can afford them from enjoying his Rembrandt and his homegrown orchids. But enjoyment of things has always been associated with the third prerogative of wealth which is the distinct it confers. In a world where nearly everyone was poor, the distinction was very great. It was the natural consequence of rarity. In England it is widely agreed, the ducal families are not uniformly superior. There is a roughly normal incidence of intelligence and stupidity, good taste and bad taste, morality, immorality. But very few people are dukes and duchesses, although the later have become rather more frequent with modern easing of divorce laws. As

a result, even though they may be intrinsically unexceptional they are regarded with some awe. So it has long been with the rich. Were dukes numerous their position would deteriorate. As the rich have become more numerous, they have inevitably become a debased currency.

- 6. The distinction conferred by wealth :
  - (A) Was unfair to the poor
  - (B) Was unlikely to spread throughout the world
  - (C) Was very great when there were few rich people
  - (D) Was very great when there were many rich people
- 7. The enjoyment of the physical possession of things :
  - (A) Is one of the privileges of wealth which has not been changed
  - (B) Is one of the privileges of wealth which should be curtailed
  - (C) Has little to do with the prerogatives of wealth
  - (D) Is a prerogative of wealth which cannot be disputed
- 8. Ducal families in England :
  - (A) Are generally agreed to be fairly common
  - (B) Are generally agreed to be fairly superior
  - (C) Are superior because they are rich
  - (D) Are generally agreed not to be always better than others
- 9. There are more duchesses now because :
  - (A) It is easier for dukes to divorce and remarry
  - (B) Dukes are more immoral than they used to be
  - (C) Their position has deteriorated
  - (D) They are debased
